

Flow Home Learning Tasks

Pick at least two tasks from the options below to complete over the half term.
Try to pick them from different columns to make sure you have chance to practise different skills.

<u>Create</u>	<u>Write</u>	<u>Experience</u>
Research an artist that has been inspired by water for example Maggi Hambling, Samantha French or Zaria Forman. See if you can recreate a painting or drawing done by one of these artists.	Find out how to save water around the home. Make a list of top tips to advise your family on water conservation.	Help organise your family's recycling, taking the glass to a bottle bank or visiting your local household waste recycling centre.
OR	OR	OR
Make a rain gauge and use it to measure rainfall in your garden.	Have a look at some household cleaning products. Many contain harmful chemicals which are washed down the drain. Research and write a report on how these chemicals affect our water.	Be a landscape gardener! Visit a garden centre and look at water features. Could you make one for your garden? You'll need water, soil, pipes, jugs and maybe some pretty stones.
