## Key Information

A **map** is a picture or drawing that shows the location of human and physical features. They often use symbols instead of words. A key explains what the symbols mean.

Maps have changed over the years. Now, we can use satellites and digital software to make them more detailed and accurate. Today, there are also more human features than in the past. Over time, it is clear to see how urban areas have grown.

The land in our local area is mainly used for farming. In the past, a lot

## Sticky Knowledge

**Physical** features form naturally and include rivers, hills, woodland and beaches.

**Human** features are man-made, they include churches, parks, bus shelters and train stations.
